Reflecting on
Summer 2020

Project

Modeling Driver Interaction in Semi-Autonomous Vehicles.
Write web-based experiment and launch on Mechanical Turk.

People

A photograph of a white door slightly ajar, revealing a dark wooden floor. The door is on the left side of the frame, and the floor is made of dark, weathered wooden planks. A blue rectangular box is overlaid on the right side of the image, containing white text.

The door is open come on in

Not just welcomed, but
encouraged

Impact of the program

Ongoing research

I've continued on this project and worked on its growth and evolution. I'm now working on the VR portion of this study.

New worlds

I had never experienced academia before so it really opened my eyes to this new world.

Graduate school

I thought grad school was simply not possible. But this program made grad school a probable path.

People

From the people in lab to the people to my cohort to the people in the program, I'm really thankful to have met and learn from such incredible people even in a remote setting.

The door is open, come on in

Welcoming

Discussing a lesson as a class certainly boosts students' interest and engagement. Aside from helping them stay focused, it allows them to think deeply, create connections, and get different perspectives on the subject matter.

Approachable

Discussing a lesson as a class certainly boosts students' interest and engagement. Aside from helping them stay focused, it allows them to think deeply, create connections, and get different perspectives on the subject matter.

Question

Discussing a lesson as a class certainly boosts students' interest and engagement. Aside from helping them stay focused, it allows them to think deeply, create connections, and get different perspectives on the subject matter.
